PROFESSIONAL SUMMARY

AI/ML Engineer and Low-Code/No-Code Architect with expertise in **agentic workflows, intelligent automation systems, and AI-powered product development**. Specialized in building scalable MVPs and production-grade systems using **Bubble, FlutterFlow, Supabase, and modern AI stacks**. Strong background in data engineering, LLM orchestration, workflow automation, and cloud-native backend systems. Proven ability to design, deploy, and optimize AI-driven products in fast-paced startup environments.

CORE COMPETENCIES

- Agentic AI Systems & Autonomous Workflows
- LLM Orchestration (LangChain-style pipelines, RAG systems)
- AI-Powered MVP Development
- Low-Code/No-Code Architecture (Bubble, FlutterFlow)
- Data Engineering & ETL Pipelines
- AI Workflow Automation
- API Integrations & Webhooks
- Generative AI & Intelligent Content Systems
- Cloud Deployment & DevOps Fundamentals

TECHNICAL STACK

AI/ML & Agentic Systems: Python, TensorFlow, PyTorch, LLM APIs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Databases, Scikit-learn, MLflow, Hugging Face
Low-Code / No-Code: Bubble, FlutterFlow
Backend & Data: Supabase (PostgreSQL, Auth, Edge Functions), REST APIs, GraphQL
Data Engineering: ETL/ELT Pipelines, Data Modeling, SQL Optimization, Airflow-style Orchestration, DWH
Cloud & Tools: Git, Docker, CI/CD, Firebase,

PROFESSIONAL EXPERIENCE

AI/ML & Automation Engineer: Slazor Limited Nigeria
Lagos, Nigeria | 2020 – Present

- Designed and deployed **agentic AI systems** capable of autonomous task planning, memory management, and workflow execution.
- Built AI-powered MVPs using Bubble and FlutterFlow integrated with Supabase backend infrastructure.
- Engineered scalable ETL pipelines for analytics and ML model training.
- Reduced manual operational workload by up to 60% through end-to-end workflow automation.

Low-Code Product Engineer

- Built production-ready mobile and web applications using FlutterFlow and Bubble.
- Integrated AI-generated content workflows and recommendation engines.
- Designed secure authentication, row-level security, and database schema optimization in Supabase.

SELECTED PROJECTS

AI Knowledge Assistant (RAG System)

- Designed multi-agent architecture with retrieval layer, reasoning agent, and response synthesizer.
- Integrated Supabase for persistent memory and vector embeddings.

EDUCATION

Diploma. – Data Engineering
Illusthetic Training Institute, Nigeria | 2020

Diploma. – Machine Learning Engineering
Illustethic Training Institute, Nigeria | 2022

B.Tech. – Physics (Electronics)
Federal University Of Technology Akure, Nigeria | 2008 – 2014
